

AbstractSavingTask

```
classDiagram
    class AbstractSavingTask
    class CheckpointSavingTask
    class VisualizationSavingTask
    CheckpointSavingTask --|> AbstractSavingTask
    VisualizationSavingTask --|> AbstractSavingTask
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'AbstractSavingTask'. Below it are two boxes: 'CheckpointSavingTask' on the left and 'VisualizationSavingTask' on the right. A horizontal line connects the two bottom boxes, with a vertical line and an upward-pointing arrow connecting this line to the bottom of the 'AbstractSavingTask' box, indicating that both 'CheckpointSavingTask' and 'VisualizationSavingTask' inherit from 'AbstractSavingTask'.
